

Research Interests:

- Small Spacecraft
- Unmanned Aircraft
- Robotics
- Optimization
- Control Systems
- Nonlinear Dynamics
- Estimation and Filtering
- Low-Power Radio Communication and Navigation

Education:

2010-2015	<i>Ph.D.</i>	<i>Aerospace Engineering</i>	<i>Cornell University</i>
		<ul style="list-style-type: none">• Dissertation: “Centimeter-Scale Spacecraft: Design, Fabrication, and Deployment”• Advisor: Mason Peck	
2009-2010	<i>M.Eng.</i>	<i>Aerospace Engineering</i>	<i>Cornell University</i>
2005-2009	<i>B.S.</i>	<i>Engineering Physics</i>	<i>Cornell University</i>

Research Experience:

- | | |
|---------------------|--|
| 2015-Present | <i>Harvard University</i> |
| | <ul style="list-style-type: none">• Developing optimization-based algorithms for robust control and system identification with applications to agile flight of small wing-morphing aircraft |
| 2009-Present | <i>Cornell University</i> |
| | <ul style="list-style-type: none">• Pioneered the development of centimeter-scale (ChipSat) spacecraft• Founded the KickSat project to launch and deploy over 100 centimeter-scale spacecraft from a CubeSat “mothership” in low Earth orbit• Raised \$74,586 through crowd-funding website Kickstarter• Awarded launch through NASA’s CubeSat Launch Initiative• Developed long-range, low-power radio communication protocol for small spacecraft• Developed novel attitude control and inertia estimation algorithms• Led a small team to design, build, test, and fly a 3U CubeSat |
| 2012-2013 | <i>NASA Ames Research Center</i> |
| | <ul style="list-style-type: none">• Developed attitude determination and control algorithms for small satellite missions• Experimented with rapid prototyping techniques for fabrication of spacecraft components• Performed integration and environmental testing for CubeSats |
| 2009 | <i>Sandia National Laboratories</i> |
| | <ul style="list-style-type: none">• Used semiconductor fabrication techniques to build prototype satellite-on-chip devices at Sandia's Center for Integrated Nanotechnology |
| 2006-2007 | <i>CU-24 Unmanned Aerial Vehicle Team</i> |
| | <ul style="list-style-type: none">• Integrated onboard computer, autopilot, and communication systems for a UAV• Developed a Linux-based software stack for video and flight data communication |

Teaching Experience:

Spring 2017 *Lab Instructor – Science of the Physical Universe – Harvard*

- Gave a lecture on spacecraft engineering and designed and taught a week of lab sections for an introductory science class for non-science majors at Harvard University.

Summer 2016 *Instructor – Clubes de Ciencia México*

- Planned and taught a one-week workshop on aerospace engineering for freshman and sophomore college students in Xalapa, Mexico. Topics included satellite subsystems, orbit mechanics, satellite communications, and GPS. Activities included tracking CubeSats with ham radio equipment and launching a high-altitude balloon.

Spring 2016 *Teaching Assistant – Optimization Algorithms for Robotics – Harvard*

- Gave guest lectures and held weekly office hours for a graduate course in optimal control and optimization-based motion planning for robotic systems
- Overall student evaluation: 4.9/5

Spring 2012 *Lecturer – Spacecraft Engineering – Cornell*

- Taught a junior-level undergraduate course (73 students) covering spacecraft orbital and attitude dynamics and space mission design

Fall 2010 *Teaching Assistant – Feedback Control Lab – Cornell*

- Ran the lab portion of a senior-level undergraduate course on feedback control systems where controllers were designed and implemented on electromechanical laboratory systems

Other Professional Experience:

2016-Present *Breakthrough Foundation*

- Member of the advisory committee and consultant for the Breakthrough Starshot project

2010 *Sentinel IC Technologies, Inc.*

- Developed high performance mixed-integer optimization code in C for semiconductor design applications

2007-2010 *Analytical Graphics, Inc.*

- Developed astrodynamics (orbital and attitude dynamics) simulation software
- Developed an algorithm for calculating rhumb lines on oblate and prolate spheroids that is now part of the Systems Tool Kit (STK) software
- Developed a C# to Java source-to-source compiler

Awards:

2016 *Distinction in Teaching Award*

- Awarded for top student reviews while serving as a Teaching Assistant at Harvard

2010 *Thomas J. and Joan T. Kelley Prize*

- Awarded for the top Master of Engineering project in Aerospace Engineering at Cornell

12. "ChipSats: Centimeter-Scale Spacecraft and How They Will Change Atmospheric Science," NASA Ames Research Center, October 24, 2012.
13. "KickSat: Kick Starting the Personal Space Age," AIAA San Francisco Chapter Small Payloads Tech Talks, October 15, 2012.
14. "The Sprite Project: Satellite on a Chip," NASA Goddard Spaceflight Center, December 12, 2011.
15. "Demonstration of a Prototype 'Sprite' ChipSat," ChipSat Workshop, Brown University, Providence, RI, February 18, 2010.

Professional Service:

1. External Thesis Committee Member, TU Delft
2. Reviewer, AIAA Journal of Aerospace Information Systems
3. Reviewer, Advances in Space Research (Journal)
4. Reviewer, 13th IEEE Conference on Automation Science and Engineering (CASE 2017)
5. Reviewer, 12th International Workshop on the Algorithmic Foundations of Robotics (WAFR)

Outreach:

1. Clubes de Ciencia Mexico 2016
2. Maker Faire NYC 2014
3. Maker Faire Bay Area 2013
